

# Metal Insets — Quatrefoil and Combining Shapes

Base Sheet

Activity Sheet

Metal inset work with the quatrefoil shape and creating designs by combining multiple inset shapes on one paper.

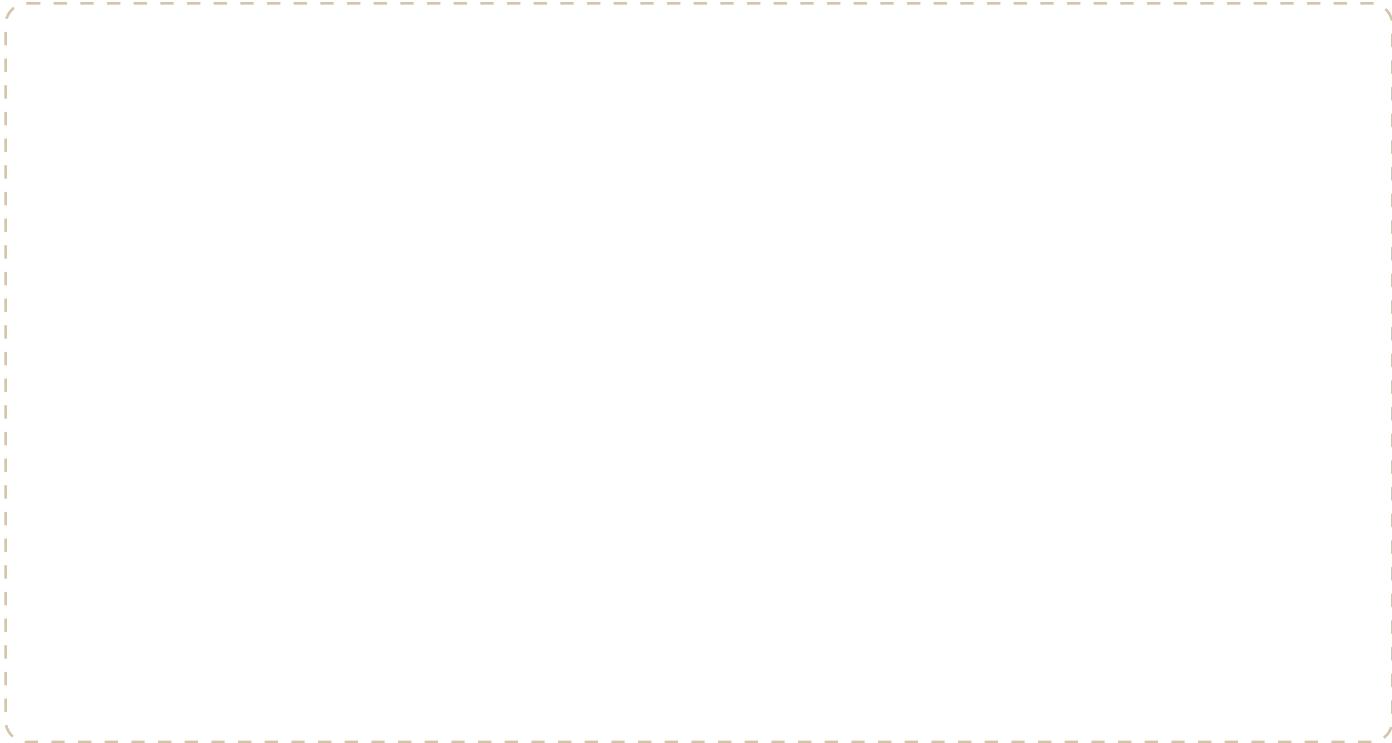

## What You Need:

- Metal insets (quatrefoil plus 2 others of child's choice)
- Paper squares
- Colored pencils (4-5 colors)
- Tray

## Steps:

1. Present the quatrefoil metal inset (four overlapping circles).
2. Trace and fill as usual.
3. Then: take two different insets (e.g., circle and triangle) and overlap them on the same paper.
4. Trace both. The overlapping area creates a new shape!
5. Fill different sections with different colors.
6. This creates beautiful geometric art.

## Work Space:

Montessori Homeschool • Print on US Letter (8.5 x 11") • Activity sheet — print on standard paper
