

Geometric Cabinet — Curved Figures Review with Cards

Activity Sheet

Base Sheet

Matching curved figures from the geometric cabinet with their corresponding three-part cards, tracing shapes, and finding curved figures in the environment.

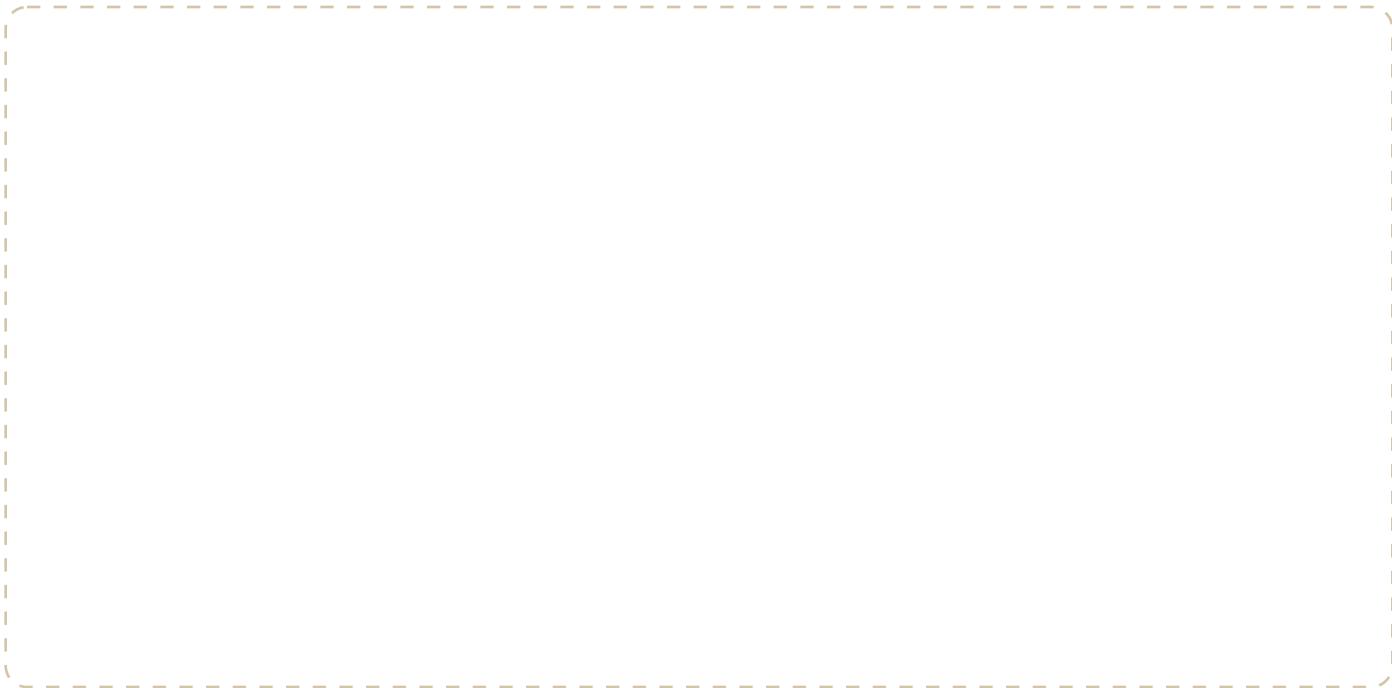

What You Need:

- Geometric cabinet — curved figures drawer
- Work mat
- Paper and colored pencils for tracing
- Three-period lesson cards (optional)

Steps:

1. Present the curved figures drawer from the geometric cabinet.
2. Remove the circle inset: 'This is a CIRCLE — it is perfectly round. Every point on the edge is the same distance from the center.'
3. Trace the frame (hole) with two fingers, then the inset.
4. Present the ellipse: 'This looks like a stretched circle — it is an ELLIPSE.'
5. Present the oval: 'An oval looks similar but is wider at one end, like an egg.'
6. Three-period lesson for circle, ellipse, and oval.
7. Trace each on paper. 'Can you tell the difference? The circle is round, the ellipse is even, the oval is wider on one side.'

Work Space:

Montessori Homeschool • Print on US Letter (8.5 x 11") • Activity sheet — print on standard paper
