

Oral Presentation Skills — Preparing to Present Your Country Research

Activity Sheet

Base Sheet

The child learns basic oral presentation skills: speaking clearly, making eye contact, using visual aids, and organizing information logically. They prepare a 3-5 minute presentation about their country study.

What You Need:

- Country research organizer and notes
- Index cards for presentation outline
- Visual aids (map, flag drawing, cultural art)
- Pencil

Steps:

1. 'When you share what you know with others, that is called a PRESENTATION. Great presenters have skills you can learn!'
2. Teach presentation basics: speak loudly and clearly, make eye contact, use visual aids (map, poster, props), organize with a beginning/middle/end.
3. The child organizes their country research into a presentation outline: opening (introduce the country), body (3-4 main facts), conclusion (why this country is special).
4. Practice: the child presents to a stuffed animal or mirror first.
5. Coach on pacing: 'Slow down. Pause between ideas. Look at your audience.'
6. 'Tomorrow you will present to the family for real!'

Work Space:

A large, dashed rectangular box occupies the lower half of the page, intended for the child to draw or write in.
